- Constant voltage, constant current
- Remote sensing and programming
- Auto-series, auto-parallel, and auto-tracking
- Front and rear output terminals
- Floating output to serve as positive or negative source

Single-Output Power Supplies

This series of constant-voltage, constant-current power supplies is available in power ranges from 100 to 200 W (in 5¼-in-high, half-rack cases). All models have 10-turn voltage and current controls that vary the voltage and current outputs from zero to the maximum rated values. Crossover from constant voltage to constant current operation occurs automatically when the load current exceeds the control settings. A four-position meter-function switch selects either of two output voltage ranges or output current ranges (X1, X0.1) for display.

These models employ a series-regulator, SCR-preregulator configuration to achieve the high efficiency necessary for a convection-cooled package of this size.

Option Descriptions

Opt 005 50-Hz AC Input (optimizes power supplies that require adjustment or modification for 50-Hz operation)	\$0
Opt 010 Chassis Slides (enable convenient access to rackmounted power supply for maintenance)	\$122
Opt 011 Internal Overvoltage Protection Crowbar	\$255
Opt 028 230-Vac, 10%, Single-Phase Input	\$0
Opt 040 (equips standard HP power supplies for resistance programming)	\$92
Opt 910 Additional Operating and Service Manual	\$15
HP 14515A 5¼-in High Rack Kit for one supply	\$179
HP 14525A 5¼-in High Rack Kit for two supplies	\$97
