

IR-700 Series Infrared Thermometers

IR-708, IR-710, IR-712, IR-720, IR-730 and IR-750

The Amprobe IR-700 series of infrared thermometers is a complete line of high performance diagnostic tools designed for HVAC/R, electrical, industrial maintenance, automotive as well as quality control and fire prevention applications. From simple spot checking to advanced data recording, the IR-700 series offers the right tool for the job.

Additional Features

- **Extremely accurate and reliable**
- **Precise measurement** with distance to spot ratio from 8:1 to 50:1
- **Wide temperature ranges** available up to -58°F to 2822°F (-50°C to 1550°C)
- **Rapid response time**
- **Laser pointer** for accurate targeting
- **8 seconds auto display hold** for easy read-out
- **Adjustable emissivity** for measuring a variety of materials (IR-712, IR-720, IR-730, IR-750)
- **Selectable °F and °C**
- **Stores up to 99 data points** (IR-750 only)
- **Thermocouple input** (IR-750 only)
- **USB interface** (IR-750 only)

Safety Certification

All Amprobe tools, including the Amprobe IR-700 Series, are rigorously tested for safety, accuracy, reliability, and ruggedness in our state-of-the-art test lab. In addition, Amprobe products that measure electricity are listed by a 3rd party safety lab, either UL or CSA. This system assures that Amprobe products meet or exceed safety regulations and will perform in a tough, professional environment for many years to come.

IR-700 Series Key Applications

Safely and easily verify temperature of major appliances, indoors and outdoors. Check the temperature of stoves, ovens and grills with a simple pull of the trigger.

The bright LCD display and red laser pointer make it easy to verify the temperature of fuses, insulation, light bulb housings, and more, even in dimly lit areas.

For precision measurements requiring the highest accuracy, emissivity can be adjusted for a wide range of material types (IR-712, IR-720, IR-730 and IR-750).

The advanced IR-750 records up to 99 data points for minimum, maximum, average, and hold, and has a USB port to export data for extensive analysis.

Fast and Accurate from a Distance The IR-700 series measures temperature up to four times a second (250ms) allowing the units to precisely pinpoint hot and cold spots. With a distance to spot ratio of up to 50:1, the series is designed to measure temperature quickly and accurately without having to touch an object.

Easy to Read Display The bright, high-contrast backlit LCD screen has an eight-second hold for reading temperature, and a low battery indicator to help prevent false readings. All models display maximum and minimum temperature, while advanced models also offer average and difference measurements (IR-712, IR-720, IR-730, IR-750).

Adjustable Emissivity for Precision Measurements The IR-700 series determines temperature by measuring emitted, reflected and transmitted energy. For enhanced accuracy, the emissivity can be adjusted to fit specific material types. Emissivity is digitally adjustable from 0.10 to 1.00 on the IR-712, IR-720, IR-730 and IR-750.
