

PORTABLE DEPANELER

FAST • EASY • SAFE

DPF-200

DPF-200 DEPANELING SYSTEM

- ECONOMICAL
- NO PROGRAMMING
- CUSTOMIZABLE GUIDES
- HIGH SPEED PRECISION SPINDLE
- PATENT PENDING GUIDE SYSTEM

REPLACEABLE FILTER

Integrated filter (Class M dust filter). The fine dust particles are collected by a filter cartridge that is easy to access.

GUIDES AND MILLING BITS

Interchangeable bits for different tab sizes ranging from 1.5mm up to 2.5mm with 2 different types for standard FR4 and metal cored PCB's. The shape of the guide rail assists the operator to safely place and maneuver the PCB until the cut is complete without harm to the PCB or operator. You can get customized guide rails to ensure a precision cut every time.

ELECTRIC VACUUM PUMP

A powerful vacuum pump is mounted directly under the table top with a vacuum hose connected at the guide rail. The hose collects the PCB dust at the source and dispenses it into the filter.
