

**New From TDK-Lambda 2400W in 1U**

# Genesys™

**Programmable DC Power Supplies  
2.4kW in 1U**

**Built in RS-232 & RS-485 Interface**

**Advanced Parallel Standard**

**New: Auxiliary Outputs 5V & 15V**

**New: RoHS Compliant**

**Optional Interfaces:**

**IEEE488.2 SCPI (GPIB)**

**Isolated Analog Programming**

**LXI Compliant LAN**

## **Genesys™ Family**

**GEN H 750W Half Rack**

**GEN 1U 750/1500W/2400W Full Rack**

**GEN 2U 3.3/5kW**

**GEN 3U 10/15kW**

## **TDK-Lambda**

[www.us.tdk-lambda.com/hp](http://www.us.tdk-lambda.com/hp)

The Genesys™ family of programmable power supplies sets a new standard for flexible, reliable, AC/DC power systems in OEM, Industrial and Laboratory applications.

## Features include:

- **New: Auxiliary Outputs, 5V, 0.2A; 15V, 0.2A For Increased System Control Functionality**
- **New: RoHS Compliant**
- **High Power Density 2.4kW in 1U**
- **Wide Range of popular worldwide AC inputs, 1Ø (230VAC) & 3Ø (208VAC)**
- **Active Power Factor Correction (Single-Phase & Three-Phase AC Input)**
- **Output Voltage up to 600V, Current up to 300A**
- **Built-in RS-232/RS-485 Interface Standard**
- **Global Commands for Serial RS-232/RS-485 Interface**
- **Auto-Re-Start / Safe-Start: user selectable**
- **Last-Setting Memory**
- High Resolution 16 bit ADCs & DACs
- Low Ripple & Noise
- Front Panel Lock selectable from Front Panel or Software
- Reliable Encoders for Voltage and Current Adjustment
- Constant Voltage/Constant Current auto-crossover
- Parallel Operation with Active Current Sharing; up to four identical units.
- Advanced Parallel Master / Slave. Total Current is Programmed and Measured via the Master.
- Independent Remote ON/OFF and Remote Enable/Disable
- External Analog Programming and Monitoring (user selectable 0-5V & 0-10V)
- Reliable Modular and SMT Design
- 19" Rack Mount capability for ATE and OEM applications
- Optional Interfaces
  - Isolated Analog Programming and Monitoring Interface (0-5V/0-10V & 4-20mA)
  - IEEE 488.2 SCPI (GPIB) Multi-Drop
  - LXI** Compliant LAN
  - USB Interface
- LabView and LabWindows™ drivers
- Five Year Warranty

## Applications

**Genesys™** power supplies have been designed to meet the demands of a wide variety of applications. System Designers will appreciate new, standard, remote programming features such as Global commands. Also, new high-speed status monitoring is available for the RS-485 bus.

**Test Systems** using the IEEE-488 bus may achieve significant cost savings by incorporating the Optional IEEE Multi-Drop Interface for a Master and up to 30 RS-485 Multi-Drop Slaves. Then up to 30 Slaves may be equipped with the less expensive Optional RS-485 Multi-Drop (MD) interface.

**Higher power systems** can be configured with up to four 2.4kW modules. Each module is 1U with zero space between them (zero stack).

**Flexible configuration** is provided by the complete Genesys™ Family: 1U 750W Half-Rack, 1U 750W/1500W/2400W 2U 3.3kW/5kW, 3U 10/15kW Full-Rack. All are identical in Front Panel, Rear Panel Analog, and all Digital Interface Commands.

**OEM Designers** have a wide variety of Inputs and Outputs from which to select depending on application and location.

1. ON/OFF Switch
2. Air Intake allows zero stacking for maximum system flexibility and power density.
3. Reliable encoder controls Output Voltage, Address, OVP and UVL settings.
4. Volt Display shows Output Voltage and directly displays OVP, UVL and Address settings.
5. Reliable encoder controls Output Current, sets Baud rate and Advanced Parallel mode.
6. Current Display shows Output Current and displays Baud rate. Displays total current in Parallel Master/Slave Mode
7. Function/Status LEDs:
 

|                 |                |                    |
|-----------------|----------------|--------------------|
| ● Alarm         | ● Fine Control | ● Preview Settings |
| ● Foldback Mode | ● Remote Mode  | ● Output On        |
8. Pushbuttons allow flexible user configuration
  - Coarse and Fine adjustment of Output Voltage/Current and Advanced Parallel Master or Slave
  - Preview settings and set Voltage/Current with Output OFF, Front Panel Lock
  - Parallel Master/Slave
  - Set OVP and UVL Limits
  - Set Current Foldback Protection
  - Go to Local Mode and select Address and Baud rate
  - Output ON/OFF and Auto/Safe Re-Start Mode

## Rear Panel Description

1. Remote/Local Output Voltage Sense Connections.
2. DIP Switches select 0-5V or 0-10V Programming and other functions.
3. DB25 (Female) connector allows (Non-isolated) Analog Program and Monitor and other functions.
4. RS-485 OUT to other Genesys™ Power Supplies.
5. RS-232/RS-485 IN Remote Serial Programming.
6. Output Connections: Rugged busbars (shown) for up to 100V Output; wire clamp connector for Outputs >100V.
7. Exit air assures reliable operation when zero stacked.
8. Input: 230VAC Single Phase, 208 VAC Three Phase, 50/60 Hz  
AC Input Connector: Phoenix P/N: FRONT-4-H-7.62.
9. Optional Interface Position for IEEE 488.2 SCPI (shown) or Isolated Analog, LAN or USB Interface.
10. Auxiliary Output Voltage Connector. Phoenix P/N IMC1.5/7-ST-3.81

\*1: Minimum voltage is guaranteed to maximum 0.2% of rated output voltage.  
 \*2: Minimum current is guaranteed to maximum 0.4% of rated output current.  
 \*3: For cases where conformance to various safety standards (UL, IEC, etc) is required, to be described as 190-240Vac (50/60Hz) for 3-Phase 208V models.  
 \*4: 3-Phase 208V models: At 208Vac input voltage, With rated output power.  
 \*5: Not including EMI filter inrush current, less than 0.2mSec.  
 \*6: 3-Phase 208V models: 170~265Vac, constant load.  
 \*7: From No-Load to Full-Load, constant input voltage. Maximum drop in Remote Sense.  
 \*8: For 8V~300V models: Measured with JEITA RC-9131A (1:1) probe. For 600V model: Measured with 10:1 probe.

\*9: From 10% to 90% or 90% to 10% of Rated Output Voltage, with rated, resistive load.  
 \*10: From 90% to 10% of Rated Output Voltage.  
 \*11: For load voltage change, equal to the unit voltage rating, constant input voltage.  
 \*12: For 8V~16V models the ripple is measured from 2V to rated output voltage and rated output current. For other models, the ripple is measured at 10~100% of rated output voltage and rated output current.  
 \*13: The Constant Current programming readback and monitoring accuracy does not include the warm-up and Load regulation thermal drift.

## 2.3 POWER SUPPLY CONFIGURATION

|                       |                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Parallel Operation | Up to Four (4) identical units may be connected in Master/Slave Mode with two wire connection. In Advanced parallel feature, the current of Master Unit, multiplied by number of units connected in parallel, is made available on digital interface and displayed on front panel of Master unit. Remote analog current monitor of the Master is scaled to output current of the Master unit (only). |
| 2. Series Operation   | Possible (with external diodes), up to identical 2 units with total output not to exceed +/-600V from chassis ground.                                                                                                                                                                                                                                                                                |

## 2.4 ENVIRONMENTAL CONDITIONS

|                          |                                                                                                                                                                                 |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Operating temperature | 0~50°C, 100% load.                                                                                                                                                              |
| 2. Storage temperature   | -20~85°C                                                                                                                                                                        |
| 3. Operating humidity    | 20~90% RH (non-condensing).                                                                                                                                                     |
| 4. Storage humidity      | 10~95% RH (non-condensing).                                                                                                                                                     |
| 5. Vibration             | MIL-810F, method 514.5, The EUT is fixed to the vibrating surface.                                                                                                              |
| 6. Shock                 | Less than 20G, half sine, 11mSec. Unit is unpacked.                                                                                                                             |
| 7. Altitude              | Operating: 10000ft (3000m), Derate output current by 2%/100m above 2000m, Alternatively, derate maximum ambient temp. by 1°C/100m above 2000m. Non operating: 40000ft (12000m). |
| 8. RoHS Compliance       | Complies with the requirements of RoHS directive.                                                                                                                               |

## 2.5 EMC

|                            |                                                   |
|----------------------------|---------------------------------------------------|
| 1. Applicable Standards:   |                                                   |
| 2. ESD                     | IEC1000-4-2, Air-disch.-8kV, contact disch.-4kV   |
| 3. Fast transients         | IEC1000-4-4, 2kV                                  |
| 4. Surge immunity          | IEC1000-4-5, 1kV line to line, 2kV line to ground |
| 5. Conducted immunity      | IEC1000-4-6, 3V                                   |
| 6. Radiated immunity       | IEC1000-4-3, 3V/m                                 |
| 7. Magnetic field immunity | EN61000-4-8, 1A/m                                 |
| 8. Voltage dips            | EN61000-4-11                                      |
| 9. Conducted emission      | EN55022A, FCC part 15-A, VCCI-A.                  |
| 10. Radiated emission      | EN55022A, FCC part 15-A, VCCI-A.                  |

## 2.6 SAFETY

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|------------------------------------------------------|----------|
| 1. Warranty                                          | 5 years. |
| All specifications subject to change without notice. |          |

## Outline Drawing Genesys™ 2.4kW Units

### NOTE

- Mating plug supplied with power supply
- Bus bars for 8V to 100V models (shown)  
Wire clamp connector for 150V to 600V models
- Chassis slides mounting holes #10-32 marked "A"  
**GENERAL DEVICES P/N: CC3001-00-S160 or equivalent**

### Parallel operation - Master/Slave:

Active current sharing allows up to four identical units to be connected in an auto-parallel configuration for four times the output power.

**In Advanced Parallel Master/Slave Mode, total current is programmed and reported by the Master, Up to four supplies act as one.**

### Series operation

Up to two units may be connected in series to increase the output voltage or to provide bipolar output. (Max 600V to Chassis Ground).

## Remote Programming via RS-232 & RS-485 Interface

Standard Serial Interface allows daisy-chain control of up to 31 power supplies on the same communication bus with built-in RS-232 & RS-485 Interface with or without Multi-Drop option.

## Programming Options (Factory installed)

### New IEEE Multi-Drop Interface

- Allows IEEE Master to control up to 30 (Multi-Drop equipped) slaves over RS-485 daisy-chain
- Only the Master needs be equipped with IEEE Interface
- IEEE 488.2 SCPI Compliant
- Program Voltage
- Measure Voltage
- Over Voltage setting and shutdown
- Error and Status Messages
- Program Current
- Measure Current
- Current Foldback shutdown

P/N: IEMD

### New Multi-Drop Slave Option

- Slaves need to be equipped with the MD Slave (RS-485) option

P/N: MD

### Isolated Analog Programming

- Four Channels to Program and Monitor Voltage and Current.
- Isolation allows operation with floating references in harsh electrical environments.
- Choose between programming with Voltage or Current.
- Connection via removable terminal block: Phoenix MC1,5/8-ST-3.81.
- Voltage Programming, user-selectable 0-5V or 0-10V signal.
  - Power supply Voltage and Current Programming Accuracy  $\pm 1\%$
  - Power supply Voltage and Current Monitoring Accuracy  $\pm 1.5\%$
- Current Programming with 4-20mA signal.
  - Power supply Voltage and Current Programming Accuracy  $\pm 1\%$
  - Power supply Voltage and Current Monitoring Accuracy  $\pm 1.5\%$

P/N: IS510

P/N: IS420

### LAN Interface

### **LXI** Compliant to Class C

- Meets all LXI-C Requirements
- Address Viewable on Front Panel
- Fixed and Dynamic Addressing
- Fast Startup
- VISA & SCPI Compatible
- LAN Fault Indicators
- Auto-detects LAN Cross-over Cable
- Compatible with most standard Networks

P/N: LAN

### USB Interface

- Allows Serial Connection to USB Port on Computer
- Serial commands same as (standard) RS-232/RS-485 Interface

P/N: USB

## How to order

## Factory options

- RS-232/RS-485 Interface built-in Standard
- GPIB (Multi-Drop Master) Interface\*
- Multi-Drop Slave Interface\*
- Voltage Programming Isolated Analog Interface\*
- Current Programming Isolated Analog Interface\*
- LAN Interface (Complies with **LXI** Class C)\*
- USB Interface\*

\* Limit of one interface option per supply

## P/N

- 
- IEMD
- MD
- IS510
- IS420
- LAN
- USB

## Accessories

### 1. Serial Communication cable

RS-232/RS-485 cable is used to connect the power supply to the Host PC.

| Mode                   | RS-485               | RS-232               | RS-232               |
|------------------------|----------------------|----------------------|----------------------|
| PC Connector           | DB-9F                | DB-9F                | DB-25F               |
| Communication Cable    | Shield Ground L=2m   | Shield Ground L=2m   | Shield Ground L=2m   |
| Power Supply Connector | EIA/TIA-568A (RJ-45) | EIA/TIA-568A (RJ-45) | EIA/TIA-568A (RJ-45) |
| P/N                    | GEN/485-9            | GEN/232-9            | GEN/232-25           |

### 2. Serial link cable\*

Daisy-chain up to 31 Genesys™ power supplies.

| Mode   | Power Supply Connector | Communication Cable  | P/N      |
|--------|------------------------|----------------------|----------|
| RS-485 | EIA/TIA-568A (RJ-45)   | Shield Ground L=50cm | GEN/RJ45 |

\* Included with power supply

**Also available, Genesys™**

**1U Half Rack 750W**

**1U Full Rack 750W/1500W/2400W**

**2U Full Rack 3300W**

**3U Full Rack 10/15kW**
