

Weller Soldering Tips

Innovative Application Solutions

Weller[®]

A comprehensive tip guide

Original tips guarantee top quality and reduced costs.

Why Genuine Weller?

Perfect Solder Joints

Only genuine Weller tips are precisely matched with the homogeneous Weller heating system, which offers the production of only the highest quality solder joints.

High-Cost Efficiency

Heat Delivery
Rapid and stable heat delivery provides a repeatable solder process with a productivity increase of up to 50%.

Original Top Quality

Only the Best Materials
Silver is used as a superior heat conductor in the heating element, optimizing heat transfer.

Manufacturer Warranty
The Weller warranty can **ONLY** be provided when using original Weller parts.

By using genuine Weller parts, you are automatically assured to be operating with the latest and greatest technology in the soldering industry. The Weller R&D Team is constantly testing and developing new techniques to manufacture the ultimate solder tip. Our efforts result in massive savings in time and operating costs for our valued customers.

How to identify Genuine Weller tips:

Seal of Quality

The soldering iron and solder tip packaging bears the "Genuine Weller Seal of Quality."

Tip Engraving

All original Weller tips are now engraved with the Weller logo and tip part numbers.*
Only engraved Weller tips guarantee our highest quality standards.
*Effective August 2013

Precise power, control, and balance.

Weller soldering tips are designed at our world class R&D Center in Germany to meet the latest demands of the market. The Weller soldering tip and high power heating element are combined to form a homogeneous and near "perfect" heating system, providing operators with the highest quality solder joints. Combined with an ergonomically designed iron, this technology offers the "perfect" soldering tool.

Every Weller tip is designed to master a specific application.

High-quality copper optimizes heat transfer to the solder joint.

Galvanized iron coating, maximizes the lifetime of the soldering tip.

Using high-quality, lead-free alloys enhances wettability and prevents oxidation.

Corrosion-resistant nickel coating, bonds the iron layer with the exterior chrome plating.

Premium chrome plating, limits the wetting area for a perfectly defined joint contact.

Three heater/tip technologies designed to master ALL soldering applications—from the most delicate to the most difficult.

Active (Integral) Tip Technology

This highly-innovative technology offers ultra precise heating and temperature control specifically designed for micro-soldering applications. The fully-integrated tip cartridge delivers the fastest recovery on the market for fine tips at just a slightly higher tip price. Temperature sensitive and miniature applications are mastered with precision and safety.

- Ultra precise performance
- Extremely accurate tip temperature
- Micro-soldering at its finest
- Fastest heat up and recovery time of all three technologies

- Fastest heat up and recovery on the market
- Excellent reaction time with finest tips
- Optimal for soldering under microscopes
- Rapid hot tip-change; no tool required

RT / RTW

Most delicate and temperature-sensitive applications; for use under microscope; ultra fine tips with fastest heat response and best temp-control; cartridge tips.

RT

WXMP-MS
WMRP/WMRP-MS

55W, 12V

Micro-slim soldering iron; Ideal for microscope work.

RTW

WXMT-MS
WMRT/WMRT-MS

2 x 40W, 12V

Micro-tweezers; Ideal for soldering and desoldering very small SMD components.

Power-Response Technology

The newly improved technology maximizes soldering performance on the most-delicate to the most-difficult applications. A perfect balance between power, response, temperature control and lower tip costs makes this unique technology the most attractive solution for top quality professional soldering designed to meet the highest industry standards.

- Maximum power and response for top performance
- Optimal balance between power, control and operating costs with widest range of tips
- Highest quality soldering standard for wide range of applications

- Maximum power and rapid response
- Optimized sensor position
- Meeting highest industry standards
- Wide tip range with low price point

XNT

SMDs and THTs with very small solder pads and increased heat demand, lower cost, non-cartridge style tips.

XNT

WXP65
WP65

65W, 24V

XT / XHT

Most difficult, high-mass soldering jobs; maximum power with ergonomic iron handle, lower cost, non-cartridge style tips.

XT

WXP120
WP120

120W, 24V

Highest standard performance iron with optimum heating power. Soldering applications from small to large components with higher heat demand required.

XHT

WXP200
WP200

200W, 24V

Highest power soldering iron; ideal for applications with highest mass applications e.g. LED back-panels or RF shields.

Silver-Line Technology

The low-mass copper tips offer the absolute best heat transfer at the lowest price in our entire range of tips. The **80W** ergonomically designed heating element and pencil type grip make this technology the top performer for universal soldering applications where tip price is a deciding factor.

- Ultra precise performance
- Extremely accurate tip temperature
- Micro- to macro-soldering at its finest

LT

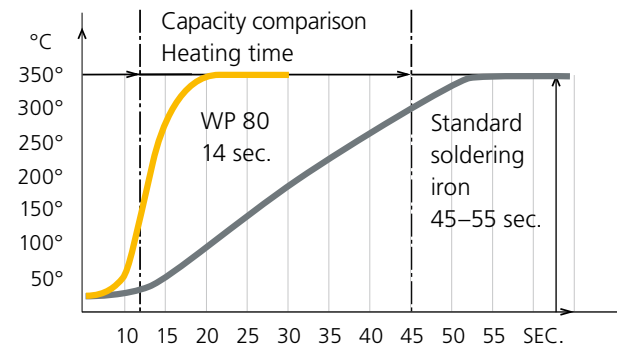

Universal SMD and THT applications both small and large; low mass silver tips offer absolute best heat transfer at lowest price in entire tip range; non-cartridge style tips.

LT

WSP80
WP80

80W, 24V

Effective heat transfer via silver core
Fast ramp up and recovery
Designed for universal applications

Weller heating technologies deliver precise power.

Three Tip Technologies

Weller heating and tip technologies are designed for specific applications which provide maximum flexibility. No other soldering iron manufacturer in the world offers this much.

Only Weller supplies three different heating and tip technologies to ensure customers always have the absolute best tool for their specific application. Weller's proven technology enables users to finally tackle those difficult or near impossible hand soldering applications. **We help you get your soldering job done better, faster and cheaper!**

Soldering iron

The soldering tip transfers the heat to the solder joint.

Custom tips available upon request.

Why Weller dry cleaning?

- Excellent cleaning results
- Soldering tip is cleaned yet remains wetted
- Aggressive flux residues are removed
- Prevents oxidation of the soldering tip
- Low temperature shock-vs-wet sponge
- Helps extend soldering tip lifetime

Weller WDC/WDC2 Dry Cleaner

Dry cleaner with brass or steel wool—recommended for dry cleaning of soldering tips using the WDC dry cleaner with brass wool. The solder tip is cleaned and flux residues are removed while tip remains wetted.
Order number: T0051512499-WDC
T0051512599-WDC2

Find out how to use the WDC dry cleaner correctly on our youtube channel: visit www.youtube.com/wellersoldering

WPB1 Cold-Tip Polishing Bar

Cleans and renews the soldering tip surface. Clean the tip only when it is COLD to prevent tip damage.
Order number: WPB1

Weller Hot-Tip Activator

For re-activation or re-wetting of dark, oxidized soldering tip, clean the tip in the activator while the tip is still HOT.
Order number: T0051303199

WHP20 Preheating Plate

Supplies additional heat energy to the PCB being soldered. This protects the board from partial overheating and allows the use of much lower, safer solder tip temperatures. Extended tip lifetime is the cost benefit.
Order number: WHP200

Tip Recycle Box

Weller Tip Recycling Box for two rounds of used tips.
Order number: T550729

How to extend the lifetime of your original Weller soldering tips.

The critical quality component in a soldering process is the soldering tip—which must transfer heat to the joint effectively and reliably. Improper care of the tips can result in quality loss and costly soldering issues. To prevent such problems and unnecessary waste, original Weller products and tips are recommended at all times.

Weller WD, WR, and WX series stations as well as the Stop & Go Safety Rest enable you to use devices in standby mode to protect the soldering tip and save energy.

Weller tips and accessories

*LED Light Ring

Resources for the future.

CARE ABOUT THE ENVIRONMENT?

Weller does and we want you to work with us to make it better.

Weller is a committed supporter of actions that help to protect our environment and to conserve its natural resources.

To this end, Weller is launching a recycling initiative for old, used soldering tips. By recycling the copper and iron from used tips, we can make a real contribution towards helping the environment and preserving its natural resources.

HOW IT WORKS:

In the United States? We want you to collect your worn out soldering tips, all types from all manufacturers, send them to us and we will arrange for their environmentally safe recycling.

This will benefit the environment but it will also benefit you because for every 2 lbs. of worn out tips you send to us you will receive a \$75.00 voucher to be used against your next purchase of Weller Brand tips.

Get involved with Weller and the environment will profit and so will you.

Please send the full TIP RECYCLING BOX to the address on the box or to:
